

**PAUL L. EVANS, D.D.S.**  
*General & Cosmetic Dentistry*

We are pleased to provide you with our knowledge and understanding regarding your dental insurance plan to the best of our ability. We will file your claims and provide you with our best estimate of what your plan will pay and any portion you may be obligated to pay. We will assist you in way we can to make the claim process as simple as possible for you.

Please understand, however, that:

- ❖ While we may be very good at understanding your insurance plan, we are not insurance experts and do not claim to know all the details, exclusions, etc. that the plan you have contains. It is your responsibility, ultimately, to know these things.
- ❖ We cannot always tell if you have used your plan elsewhere during the coverage period and that some of your benefits have already been used. It is your responsibility to inform us if you have used your dental plan in another office during the coverage period.
- ❖ Dental insurance plans often will not pay for the replacement crowns, bridges, dentures, etc. within a certain time frame from the original placement. It is ultimately your responsibility to inform us when dental work from another office was completed if it needs to be replaced.
- ❖ We do not place amalgam (silver/mercury) fillings in this office. Some insurance companies will only pay for the amalgam filling fee which is less than a composite filling fee which we use. You are responsible, ultimately, to know what your plan will cover and responsible for the difference in cost.

Thank You!

Dr. Paul Evans
